## PROFESSIONAL EXPERIENCE

---

### University at Buffalo

Buffalo, NY

*Student Technician*

*April 2025 - Current*

- Imaged and deployed Windows 10/11 and MacOS devices using industry-standard configuration tools
- Troubleshooted and resolved critical connectivity and software errors for a broad user base
- Managed initial hardware provisioning and user-end configurations to meet university security standards
- Actively contributed to internal IT initiatives, supporting network stability and hardware refreshes

### Honeywell

Atlanta, GA

*Software Engineer*

*June 2025 - Current*

- Developed an anomaly detection and reporting system that processed 20,000+ data points, identified outliers, and surfaced recurring patterns across large datasets.
- Built a data analysis workflow to automatically flag abnormal trends, compare data behavior across records, and generate explanations for why anomalies may be occurring.
- Created automated reports summarizing detected outliers, pattern trends, and likely root causes to support faster engineering review and data-driven decision-making.
- Improved data investigation efficiency by reducing the need for manual spreadsheet review and enabling quicker identification of unusual behavior in high-volume datasets.
- Applied software engineering and data analysis principles to clean, process, analyze, and interpret large-scale datasets for enterprise engineering use cases.

### Collegiate Science and Technology Entry Program (CSTEP)

Buffalo, NY

*Summer Research Intern*

*May 2025 - August 2025*

- Selected as **1 of 28 students out of 500** for an **8.5-week competitive undergraduate research program** at the University at Buffalo
